### FINDINGS OF FACT

1. On March 23, 2023, Objector withdrew their objections to claims 40A 179832-00, 40A 179835-00, 40A 179836-00, 40A 179850-00, and 40A 179887-00. (Doc.<sup>1</sup> 8.00).

#### **Priority Date Objections**

*40A 179852-00*

2. Claim 40A 179852-00 appeared in the Basin 40A Preliminary Decree as a claim for stock drinking directly from a spring in the SESENE of Section 14, T4N, R16E, Sweet Grass County.

3. The claim was decreed with a priority date of January 25, 1964. The Statement of Claim listed 1963 as the priority date, based on the Notice of Completion of Groundwater Appropriation attached to the Statement of Claim. The type of right was set as “filed”.

4. The priority date was modified during DNRC verification to the date the Notice of Completion was filed – January 25, 1964.

5. Cremer Rodeo Land & Livestock Co. objected to the priority date, stating:

Nelson Story arrived in Livingston, Montana including area of this ranch in December 1866 with over 600 head of cattle from Texas (The Crazy Mountain Museum and the Big Sky Words website). The first ranchers on the Musselshell were William Gordon and Perry, Sanford, and John Moore. William Gordon brought a small group of cattle to the Upper Musselshell in 1870 to winter there and by 1885 had over 1,200 head of cattle (Milton Ranch History). John Murphy started the 79 Ranch in 1879 and had over 10,000 head of cattle in the Musselshell drainage by 1883 Milton Ranch History. The priority date of this claim should be changed from 01/25/1964 to 12/31/1866. Livestock have been watering at the location of this claim to the present time. The source name also requires correction, the spring does not flow into a named source.

6. On March 23, 2023, Objector filed an affidavit from Matt Cremer. (Doc. 9.00).

7. The affidavit includes a screenshot of the land patent for the W2 of Section 14, T4N, R16E, Sweet Grass County granted to Leo E. Cremer on August 14, 1917.

8. Mr. Cremer states that:

---

<sup>1</sup> “Doc.” numerical references correlate to case file docket numbers in the Water Court’s Full Court case management system.

My family has continuously grazed livestock on the land located at the place of use and point of diversion for this claim since 1915. Based on the land patent for the point of diversion and place of use for this claim and the continuous historical use by my family, the priority date should be modified from 1/25/1964 to 8/14/1917.

9. However, the land patent does not cover the point of diversion and place of use for claim 40A 179852-00. The affidavit states the land patent for the W2 of Section 14 is relevant to historical use in Section 25 because it “is in the area of the legal description of the point of diversion and place of use for claim 40A 179852-00.” The land patent is for both a different section than the claimed point of diversion and place of use.

12. The priority date was modified during DNRC verification to the date the Notice of Completion was filed – January 25, 1964.

13. Cremer Rodeo Land & Livestock Co. objected to the priority date, stating:

### Source Name Objections

51. Objector also filed objections to the source name of claims 40A 179852-00, 40A 179862-00, 40A 179865-00, 40A 179866-00, 40A 179879-00, 40A 179884-00, and 40A 179885-00, as follows:

The source name also requires correction, this spring does not flow into a named source.

52. Springs, even those that do not flow into a named source, are named using the first downstream or down gradient named source. According to the DNRC Claims Examination Manual:

c. Unnamed Springs: A claimed spring without a name or with a claimed name that does not meet the acceptable standardization criteria is considered an unnamed spring. To establish a standard source name, identify the first downstream (or down gradient, if not connected) named source, even if far away from the spring. This puts the spring in a sub-basin, enhancing the usefulness of the database. [Rule 11\(c\)\(3\), W.R.C.E.R.](#)

All unnamed springs will be standardized on the worksheet to "Spring, Unnamed Tributary of \_\_\_\_\_" (using the first down gradient named source). Attach the spring to an

unnamed tributary even if not apparently connected such as an ephemeral stream. [Rule 11\(c\)\(3\), W.R.C.E.R.](#)

See Claims Examination Manual, VI, D.6.c.

### PRINCIPLES OF LAW

1. A properly filed Statement of Claim for an existing water right is prima facie proof of its content. Section 85-2-227, MCA; Rule 10, W.R.Adj.R.
2. Prima facie proof may be contradicted and overcome by a preponderance of the evidence. Rule 19, W.R.Adj.R.
3. A preponderance of the evidence is evidence that shows a fact is “more probable than not.” *Hohenlohe v. State*, 2010 MT 203, ¶ 33, 357 Mont. 438, 240 P.3d 628.
4. If prima facie status is overcome, the burden shifts back to the claimant to demonstrate historical use. *79 Ranch v. Pitsch*, 204 Mont. 426, 432-33, 666 P.2d 215, 218 (1983).

5. The party seeking to overcome the prima facie status of a Statement of Claim bears the burden of proof. *Nelson v. Brooks*, 2014 MT 120, ¶¶ 34, 37, 375 Mont. 86, 329 P.3d 558.

6. Sanctions applied against objectors and intervenors may include dismissal of the objector or intervenor from the proceeding. Rule 22, W.R.Adj.R.
